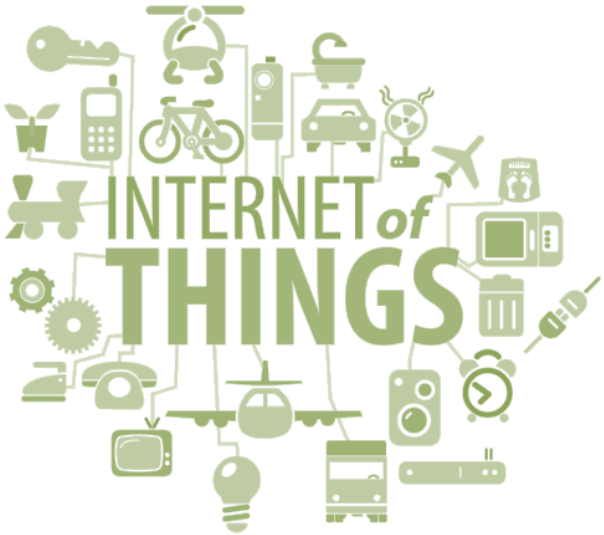
Are you looking for an internship?

We are looking for a proactive and self-motivated **last-year student** willing to carry out an internship. You would have the opportunity of working on IoT, energy harvesting, nanogenerators, microsystems, smart materials and low-power electronic devices.

If you are finishing a Degree on Electronics, Telecommunications or similar Engineering degree, **send us your CV** to consider your candidature at **contact@energiot.com**. Good level of English is a must. Possibility of being hired after the internship period.



***Energiot Devices* SL** is a young start-up company that develops microenergy generators to build autonomous IoT devices, the next big revolution!
